Kosovska Mitrovica – Master's Degree

Environmental engineering  
2017 – 2020

Faculty of Technical Sciences,  
Kosovska Mitrovica – Bachelor's Degree

Environmental engineering  
2009 – 2017

### HOBBIES

I have been playing guitar and bass guitar for nearly twenty years, with bass as my primary instrument. I had a band and performed at most of the major festivals in the country and the region. Although I'm not as active in music anymore, it still plays a significant role in my life. I believe that frontend development is the perfect way for me to express my artistic freedom. This passion greatly influenced my career choice and is what attracts me most to the job, as it allows me to blend creativity with technical skills.

### PROFILE

I am a Frontend Developer with over three years of experience, specializing in creating modern, responsive websites and custom WordPress themes using technologies such as HTML, CSS, JavaScript, and PHP. My primary focus is on frontend development, where I combine creativity and technical expertise to deliver high-quality, user-centered solutions.

Recently, I have enhanced my skill set by learning React, which I demonstrated through my portfolio project. While I am still building professional experience with React, I am eager to integrate it into my future work. My ability to work efficiently both in teams and independently ensures consistent delivery of reliable, maintainable, and visually appealing web solutions.

### EXPERIENCE

JV Dev Center2024 – Present

Wordpress Developer

Collaborated with the JV Dev Center team to manage all aspects of website development, including design, frontend, backend, responsiveness, and deployment. Focused on creating tailored WordPress solutions by leveraging custom themes and Elementor to deliver modern, responsive, and client-centric websites. Ensured high-quality standards in design and functionality, while optimizing projects for performance and usability.

Bureau TwentyTwo2021 – 2024

Web Developer

Worked as a Web Developer, focusing primarily on frontend development with technologies such as HTML, CSS, and JavaScript. In the last year, I expanded into backend development using PHP, gaining comprehensive experience in building full-stack web solutions. Developed websites with custom themes, coding entirely from scratch to ensure unique and tailored results. Collaborated closely with designers to create pixel-perfect, responsive, and SEO-optimized websites. Consistently delivered projects that met high technical and visual standards, enhancing both user experience and performance.

### PROJECTS

Portfolio Site

Open Link

My portfolio website was developed to showcase my frontend skills, marking my first project with React. Throughout this project, I learned how to work with React components, state management, and hooks. The site is fully responsive, optimized for mobile devices, and SEO-friendly, with a focus on performance and loading speed. This project marks my transition from WordPress to React, highlighting my progress in mastering modern frontend frameworks. It emphasizes my commitment to delivering high-quality user experiences, ensuring seamless interactions, and demonstrating my ability to create dynamic and performance-optimized websites.

Technologies: React, State Management, HTML, CSS, Responsive, Google Analytics, FTP/Hosting

Bureau TwentyTwo

Open Link

For the agency specializing in design, branding, and development, I worked on the complete redesign of their existing website. In close collaboration with the design team, I was responsible for the entire development process, including both frontend and backend work. On the frontend, I created pages, custom post types, animations, and ensured full responsiveness. I also implemented the backend, including server configuration, as well as deploying the site on their existing hosting environment.

Technologies: HTML, CSS, JavaScript, PHP, WordPress, Responsive, JS/CSS Animation, jQuery, SEO, FTP/Hosting, Robots

The Daily Muck

Open Link

A news portal required a WordPress solution tailored to their business with a custom design. In collaboration with the design team, I was responsible for the entire development, handling both frontend and backend aspects. On the frontend, I implemented the design with a focus on performance, responsiveness, and SEO optimization, ensuring a seamless user experience. On the backend, I configured custom post types, set up search functionality, and implemented pagination to handle large volumes of content efficiently. I also worked on integrating necessary plugins to extend the portal's functionality, ensuring it met the specific needs of a dynamic news platform.

Technologies: HTML, CSS, JavaScript, PHP, WordPress, Responsive, jQuery, SEO, FTP/Hosting

3AP

Open Link

The company, specializing in software solutions and business process digitalization, needed to transition to a WordPress site. During this project, I was responsible for all aspects of development, including frontend design, animations, responsiveness, and SEO optimization. On the backend, I implemented necessary custom functionalities, configured custom post types, created filters for efficient content search, and integrated essential plugins to meet the company's specific needs. I also focused on performance optimization and ensured smooth interaction between the frontend and backend.

Technologies: HTML, CSS, JavaScript, PHP, WordPress, Responsive, jQuery, SEO, FTP/Hosting

Plants By Number

Open Link

A company specializing in selling plants online needed a new WordPress solution for their business. On this project, I was responsible for developing the frontend solutions, including page design, animations, responsiveness, and SEO optimization. My focus was on creating a user interface that allows easy and fast product search and enhances the customer experience on the site.

Technologies: HTML, CSS, JavaScript, PHP, WordPress, Responsive, jQuery, SEO, WooCommerce

Executive Assistants

Open Link

The Executive Assistance website focuses on providing recruitment services specifically tailored for executive and administrative assistants. I played a key role in this project by managing the entire frontend development process. I was responsible for page design, animations, responsiveness, and SEO optimization, ensuring the site was visually appealing and functional with an emphasis on enhancing the user experience.

Technologies: HTML, CSS, JavaScript, WordPress, Responsive, jQuery, SEO
