Environmental engineering

2017 - 2020

Bachelor's Degree - Faculty of Technical Sciences, Kosovska Mitrovica

Environmental engineering

2009 - 2017

HOBBIES

I have been playing guitar and bass guitar for nearly twenty years, with bass as my primary instrument. I had a band and performed at most of the major festivals in the country and the region. Although I'm not as active in music anymore, it still plays a significant role in my life. I believe that frontend development is the perfect way for me to express my artistic freedom. This passion greatly influenced my career choice and is what attracts me most to the job, as it allows me to blend creativity with technical skills.

PROFILE

I am a Frontend Developer with over three years of experience, specializing in creating modern, responsive websites and custom WordPress themes using technologies such as HTML, CSS, JavaScript, and PHP. My primary focus is on frontend development, where I combine creativity and technical expertise to deliver high-quality, user-centered solutions.

Recently, I have enhanced my skill set by learning React, which I demonstrated through my portfolio project. While I am still building professional experience with React, I am eager to integrate it into my future work. My ability to work efficiently both in teams and independently ensures consistent delivery of reliable, maintainable, and visually appealing web solutions.

EXPERIENCE

JV Dev Center
2024 - Present

Wordpress Developer

- Collaborated with the JV Dev Center team on full website development, including design, frontend, backend, responsiveness, and deployment.
- Created custom WordPress solutions using custom themes and Elementor for modern and responsive websites.
- Optimized projects for high performance and usability while ensuring high standards of design and functionality.

Bureau TwentyTwo
2021 - 2024

Web Developer

- Worked as a Web Developer, primarily focusing on frontend development with HTML, CSS, and JavaScript.
- Expanded into backend development using PHP, gaining full-stack experience.
- Developed websites with custom themes, coding from scratch for unique and tailored solutions.
- Collaborated with designers to create pixel-perfect, responsive, and SEO-optimized websites.
- Consistently delivered high-quality projects, enhancing user experience and performance.

PROJECTS

Portfolio Site
Open Link

- Developed my portfolio in React as a direct application of the knowledge gained through learning.
- Utilized React components, hooks, and state management throughout the project.
- Created a fully responsive, mobile-optimized, and SEO-friendly site with a focus on performance.
- Transitioned from WordPress to React, demonstrating progress in modern frontend frameworks.
- Highlighted commitment to high-quality user experiences, seamless interactions, and performance optimization.

Technologies: React, State Management, HTML, CSS, Responsive, Google Analytics, FTP/Hosting

Bureau TwentyTwo
Open Link

- Led the complete redesign of a design, branding, and development agency's website.
- Worked closely with the design team, handling both frontend and backend development.
- Developed pages, custom post types, animations, and ensured full responsiveness.
- Configured the backend, managed server setup, and deployed the site on their existing hosting.

Technologies: HTML, CSS, JavaScript, PHP, WordPress, Responsive, JS/CSS Animation, jQuery, SEO, FTP/Hosting, Robots

The Daily Muck
Open Link

- Developed a custom WordPress solution for a news portal, ensuring a tailored design and seamless user experience.
- Managed both frontend and backend development, focusing on performance, responsiveness, and SEO optimization.
- Configured custom post types, search functionality, and pagination for efficient content management.
- Integrated necessary plugins to enhance functionality and meet the needs of a dynamic news platform.

Technologies: HTML, CSS, JavaScript, PHP, WordPress, Responsive, jQuery, SEO, FTP/Hosting

3AP
Open Link

- Led the transition of a software solutions company to a WordPress site, handling both frontend and backend development.
- On the frontend, I worked on design, animations, responsiveness, and SEO optimization for enhanced user experience.
- On the backend, I implemented custom functionalities, configured post types, added filters for content search, and integrated essential plugins.
- Focused on performance optimization and ensured smooth integration between frontend and backend.

Technologies: HTML, CSS, JavaScript, PHP, WordPress, Responsive, jQuery, SEO, FTP/Hosting
